Wesleyan Medical Fellowship is an Auxiliary of the Wesleyan Church whose purposes are: to identify and enlist health professionals, including students, around the world; to establish local chapters where there are members; to fill positions in our hospitals and clinics overseas; to provide community outreach as needed (blood pressure screening, free clinics, etc.); to find resources to meet health care needs within and outside North America; to provide professional counsel to any area of the Wesleyan Church; to collect and disburse funds for medical missions at home and abroad. Our chief goal is to bring glory to Jesus Christ, our Lord and Savior. WMFs efforts have impacted many, resulting in conversions and subsequent church growth. Future ministry will be determined by the many changes occurring in medical missions. Pray that the leaders of WMF will be sensitive to the leading of the Holy Spirit and respond to new challenges for the glory of God.
